Natural Gas Seminars - Coming Spring 2010

Marcellus Drilling 201: The Mechanics and Issues Related to Development of This Natural Gas

Tom Murphy, Penn State Cooperative Extension Educator, Energy Development, will provide an overview of Marcellus development starting with the initial seismic studies, leading to the actual drilling process and hydrofracing, and ending with the gas being produced and marketed. Although much of the presentation will deal with the mechanics of the process, he will also cover many of the related issues that explain this emerging industry in large areas of Pennsylvania.

Date: Wednesday, January 20, 2010
Time: 6 - 8 p.m.

The Natural Gas Drilling and its Effect on Roads, Bridges, and Other Municipal Concerns

Tim Ziegler, Field Operations Specialist, Center for Dirt and Gravel Road Studies, and Scott Sjolander, Educator, Penn State Cooperative Extension, Crawford County, will cover what effects natural gas drilling in the county may have on roads, bridges and other infrastructure and how parties may resolve these issues.

Date: Tuesday, February 16, 2010
Time: 6-8 p.m.

The Environment & Natural Gas Operations - Minimizing Impacts to Forests and Wildlife

Robert S. Hansen, Penn State Cooperative Extension Educator, Agriculture and Forestry, will discuss the importance of our natural environment, the changes natural gas development may bring to the environment and what can be done to minimize these impacts.

Date: Wednesday, March 24, 2010
Time: 6-8 p.m.
